Notes to the Condensed Consolidated Interim Financial Statements

For the nine months ended September 30, 2011

1. Nature and continuance of operations

Jayden Resources Inc. (the “Company”) was incorporated under the laws of the Province of British Columbia. On December 9, 2010, the Company graduated from the TSX Venture Exchange to the TSX Exchange (“TSE”) where the shares are traded under the symbol JDN. The Company, together with its subsidiaries (collectively referred to as the “Group”), is principally engaged in the business of acquiring, exploring and developing interests in mining projects. To date, the Group has not generated revenues from its principal activities and is considered to be in the exploration stage.

The Group is in the process of exploring its mineral property interests and has not yet determined whether its mineral property interests contain mineral reserves that are economically recoverable. The Group’s continuing operations, and the recoverability of the amounts shown for mineral properties are entirely dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its mineral property interests, and on future profitable production or proceeds from the disposition of the mineral property interests.

The business of exploring for and mining of minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations.

The head office and principal address of the Company are located at Suite 1980, 1075 West Georgia Street, Vancouver, British Columbia, V6E 3C9. The registered and records office are located at Suite 1500, 1055 West Georgia Street, Vancouver, British Columbia, V6E 4N7.

2. Basis of presentation

(a) Statement of compliance

These condensed consolidated interim financial statements are prepared in accordance with International Accounting Standards (“IAS”) 34, *Interim Financial Reporting*, as issued by the International Accounting Standards Board (“IASB”) on a basis consistent with the significant accounting policies disclosed in note 4 of the most recent annual consolidated financial statements as at and for the year ended December 31, 2010 as filed on SEDAR at www.sedar.com. The condensed consolidated interim financial statements do not include all of the information required for full annual financial statements and were approved and authorised for issue by the Board of Directors on November 14, 2011.

(b) Basis of measurement

The financial statements have been prepared under the historical cost basis except for the financial instruments classified as available-for-sale investments which are stated at fair value. The measurement bases are fully described in the accounting policies.

(c) Functional and presentation currency

The condensed consolidated interim financial statements are presented in Canadian Dollars (“CDN\$”), which is the functional currency of the Company.

2. Basis of presentation (continued)

(d) Critical accounting judgements and estimates

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations as of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Depreciation

The Group's management exercises its judgement in estimating the useful lives of the depreciable assets. The estimated useful lives reflect the management's estimate of the periods the Group intends to derive future economic benefits from the use of these assets. The Group depreciates its property, plant and equipment in accordance with the accounting policies. The carrying amount of the property, plant and equipment is disclosed in Note 9.

Asset retirement obligations

The Group recognises the liability for an asset retirement obligation. The relevant costs in associated with the assets retirement obligations are estimated based on the Group's interpretation of current regulatory requirements. Based on the assessment, the Group did not have any significant asset retirement obligations at the reporting dates.

Critical judgements in applying the Group's accounting policies

The following is the critical judgement, apart from those involving estimations that management have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognized in the financial statements.

Exploration and evaluation assets

When there are events or changes in the circumstances which indicate the carrying amount of the exploration and evaluation assets may not be recoverable, the Group will take into consideration of the recoverable amounts of the relevant cash generating unit ("CGU"). After taking into account the current economic environment, the management reviews the developing projects and exploration plans and confirms that there is no indicator for impairment on the exploration and evaluation assets of the Group at the reporting dates.

Impairment of available-for-sale investments

For available-for-sale investments, a significant or prolonged decline in fair value below its cost is considered to be objective evidence of impairment. Judgement is required when determining whether a decline in fair value has been significant and/or prolonged. In making this judgement, the historical data on market volatility as well as the price of the specific investment are taken into account.

3. Changes in accounting policies

Future accounting changes

The following pronouncements from the IASB will become effective for financial reporting periods beginning on or after January 1, 2013 and have not yet been adopted by the Company. All of these new or revised standards permit early adoption with transitional arrangements depending upon the date of initial application.

- IFRS 9, *Financial Instruments* addresses the classification and measurement of financial assets.
- IFRS 10, *Consolidated Financial Statements* builds on existing principles and standards and identifies the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements of the parent company.
- IFRS 11, *Joint Arrangements* establishes the principles for financial reporting by entities when they have an interest in arrangements that are jointly controlled.
- IFRS 12, *Disclosure of Interest in Other Entities* provides the disclosure requirements for interests held in other entities including joint arrangements, associates, special purpose entities and other off balance sheet entities.
- IFRS 13, *Fair Value Measurement* defines fair value, requires disclosure about fair value measurements and provides a framework for measuring fair value when it is required or permitted within the IFRS standards.
- IAS 19, *Employee Benefits* revises the existing standard to eliminate options to defer the recognition of gains and losses in defined benefit plans, requires remeasurements of a defined benefit plan's assets and liabilities to be presented in other comprehensive income and increases disclosure.
- IAS 27, *Separate Financial Statements* revised the existing standard which addresses the presentation of parent company financial statements that are not consolidated financial statements.
- IAS 28, *Investments in Associate and Joint Ventures* revised the existing standard and prescribes the accounting for investments and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures.

The IASB also issued *Presentation of Items of Other Comprehensive Income*, an amendment to IAS 1 *Financial Statement Presentation*. The amendment addresses the presentation of other comprehensive income and requires the grouping of items within other comprehensive income that might eventually be reclassified to the profit and loss section of the income statement. The change becomes effective for financial years after July 1, 2012 with earlier adoption permitted.

Information on new and amended IFRSs that are expected to have an impact on the Group's accounting policies is provided in note 2(b) of the most recent annual consolidated financial statements as at and for the year ended December 31, 2010.

The directors are in the process of assessing the impact of other new or revised IFRSs upon initial adoption. So far, the directors anticipate that the application of these IFRSs is unlikely to have a significant impact on the Group's results and financial positions.

8. Loss per share

The calculation of the basic loss per share for the periods is presented based on the following data:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Loss attributable to the owners of the Company (\$)	(171,801)	(768,591)	(1,289,023)	(3,816,284)
Weighted average number of shares in issue during the period	183,156,072	183,152,268	183,153,550	140,886,360
Loss per share for loss attributable to the owners of the Company during the period	(0.0009)	(0.0042)	(0.0070)	(0.0271)

Diluted loss per share for the periods ended September 30, 2011 and 2010 is the same as basic loss per share as the impact of the exercise of the share options and warrants is anti-dilutive.

(a) Silver Coin Property

In 2004, the Company entered into an option agreement with Mountain Boy Minerals Ltd. ("Mountain Boy") whereby the Company can acquire a 51% interest in Mountain Boy's 100% owned Silver Coin and 55% owned Dauntless projects as well as the 100% owned FR claims (collectively, the "Silver Coin Property") by spending \$1.75 million on exploration on the Silver Coin Property over a three year period (incurred). In 2006, the Company earned a 51% interest in the Silver Coin Property.

In July 2009, the Company entered into an agreement with Mountain Boy to increase its ownership in the Silver Coin Property to 70% and to purchase land and buildings in Stewart, BC in return for a payment of \$440,000 (paid) of which \$340,000 was allocated to the Silver Coin property and \$100,000 to land and buildings inclusive of goods and services tax. The agreement gives the Company the exclusive right to manage the project through feasibility and also to negotiate on behalf of both parties the sale of the Silver Coin Property and Kansas Property.

In September 2011, pursuant to this agreement, the Company increased its ownership to 80% after spending \$4,000,000 on exploration and development expenditures on any or all of the Silver Coin Property and Kansas Property.

10. Exploration and evaluation assets (continued)

(a) Silver Coin Property (continued)

In September 2011, the Company entered into an asset purchase agreement with Nanika Resources Inc. (“Nanika”) to acquire Nanika’s 45% interest in mineral claims INDI 9-12 (collectively, the “INDI Claims”) which are adjacent to and form part of the Company’s Silver Coin property. The Company paid \$250,000 and issued 350,000 shares of the Company to complete the agreement. Nanika retains a 2% net smelter returns royalty on the INDI claims which at any time the Company can buy-back for \$1,000,000 per each 1%.

(b) Kansas Property and Summit Lake Property

In 2004, the Company entered into an option agreement with Tenajon Resources Corp. (“Tenajon”) whereby the Company earned a 60% interest in Tenajon’s 100% owned Kansas Property by making a cash payment of \$50,000 (\$25,500 paid by the Company and \$24,500 paid by the joint venture partner Mountain Boy) on signing, issuing 77,000 common shares and spending \$1.0 million on exploration and development.

The Kansas Property adjoins the Silver Coin Property. The expenditures incurred on the Kansas Property are included in the Silver Coin Property expenditures and are eligible for the expenditures required for the Silver Coin Property. Pursuant to an option agreement entered into with Mountain Boy in 2004, Mountain Boy will be participating in the Kansas Property and earned a 49% interest in the Company’s 60% interest by making a cash payment of \$24,500 upon the signing of the agreement and issuing to the Company 98,000 shares of Mountain Boy. If the Company elects to put the Kansas Property or any adjoining property into production, Mountain Boy would be reduced to owning 40% of the Company’s interest.

In April 2008, the Company entered into a binding letter agreement whereby the Company purchased Tenajon’s wholly owned subsidiary, 0781639 B.C. Ltd. which holds an undivided 40% ownership interest in the Kansas Property and a 100% ownership interest in the Summit Lake property. Since 0781639 B.C. Ltd.’s only asset is mineral properties and it is not considered a business, the transaction was accounted for as an asset acquisition.

On closing, the Company issued to Tenajon 13,500,000 common shares at a value of \$2,430,000 and incurred related costs totalling \$165,000. The Company also issued 187,500 units with a value of \$37,500 in relation to this acquisition. In addition, the Company reimbursed Tenajon \$15,000 for a reclamation deposit which the Company assumed and \$85,000 for geological and exploration work on the Summit Lake property. The Company was also granted an option to purchase the 3% net smelter royalty (“NSR”) held by Tenajon on the Summit Lake property by paying \$115,000 which the Company declined.

During 2009, the Company sold the Summit Lake property and transferred the 3% NSR for a cash payment of \$200,000 and wrote off the remaining carrying value of \$136,457 and reclamation deposit of \$15,000.

The July 2009 agreement with Mountain Boy sets the Company’s interest in the Kansas Property at 70% with Mountain Boy at 30%. The Company will further increase its ownership to 80% after spending \$4,000,000 on exploration and development expenditures on any or all of the Silver Coin Property and Kansas Property by July 2014.

18. Capital risk management

The Group's capital management objectives are to insure the Group's ability to continue as a going concern so as to benefit from its operations to provide an adequate return for its shareholders.

The Group manages its capital structure and makes adjustments to it based on the funds available to the Group in order to support the acquisition, exploration and development of mineral properties. The Group defines capital that it manages as its shareholders' equity. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The properties in which the Group currently has an interest are in the exploration stage; as such, the Group has historically relied on the equity markets to fund its activities. In addition, the Group is dependent upon external financings to fund activities. In order to carry out planned exploration and pay for administrative costs, the Group will spend its existing working capital and raise additional funds as needed. The Group will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

18. Capital risk management (continued)

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Group, is reasonable.

The Group is not subject to externally imposed capital requirements.

19. Financial instruments and financial risk management

The Group is exposed to financial risks through its use of financial instruments in its ordinary course of operations. The financial risks include market risk (including currency risk, interest risk and other price risk), credit risk and liquidity risk. The Group does not have any written risk management policies and guidelines. However, the board of directors meets periodically to analyze and formulate measures to manage the Group's exposure to the market risk (including currency risk, interest risk and other price risk), credit risk and liquidity risk.

Generally, the Group employs conservative strategies when considering risk management. As the Group's exposure to the market risk is kept to a minimum level, the Group has not used any derivative financial instruments for hedging purposes. The Group does not hold or issue derivative financial instruments for trading purposes. The most significant financial risks to which the Group is exposed are described below. A summary of the Group's financial assets and liabilities by category is disclosed below.

(i) Currency risk

Some of the operating expenses and cash held are denominated in foreign currencies and as such are subject to currency risk. The Group does not enter into derivative financial instruments to mitigate this risk but the Group does not believe its net exposure to foreign exchange risk is significant.

Foreign currency denominated cash and cash equivalents, translated into Canadian dollars at the closing rates are as follows:

19. Financial instruments and financial risk management (continued)

The following table details the Group's sensitivity to a 10% increase or decrease in the Canadian dollar against the foreign currency denominated monetary items above. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the end of the period/year for a 10% change in foreign currency rates. A positive number indicates a decrease in loss for the period/year where the foreign currencies strengthen against the Canadian dollar. The opposite number will result if the foreign currencies depreciated against the Canadian dollar.

(ii) Credit risk

The Group's cash is held in authorized Canadian financial institutions. The Group does not have any asset-backed commercial paper. Management believes that the credit risk concentration with respect to its financial instruments is minimal.

The Group adopts conservative investment strategies. Usually investments are in liquid securities quoted on recognized stock exchanges. No margin trading is allowed. Loans and financial guarantees to individuals on non-Group entities have to be approved by the board of directors. The board monitors the Group's overall investment position and exposure on a day to day basis.

The credit and investment policies have been followed by the Group since prior years and are considered to have been effective in limiting the Group's exposure to credit risk to a desirable level.

(iii) Interest rate risk

Interest rate risk is the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group has interest-bearing assets in relation to cash at banks and GICs carried at floating interest rates with reference to the market. The Group's operating cash flows are substantially independent of changes in market interest rates. The Group has not used any financial instrument to hedge potential fluctuations in interest rates. The exposure to interest rates for the Group is considered minimal. The Group has no interest bearing borrowings.

The policies to manage interest rate risk have been followed by the Group since prior years and are considered to be effective.

(iv) Liquidity risk

The Group's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Group manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the board of directors are actively involved in the review, planning and approval of significant expenditures and commitments.

The liquidity policies have been followed by the Group since prior years and are considered to have been effective in managing liquidity risk.

(v) Other price risk

Other price risk relates to the risk that the fair values or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than changes in interest rates and foreign exchange rates). The Group is exposed to change in market prices of listed equity in respect of its investments classified as available-for-sale investments (Note 11).

The policies to manage other price risk have been followed by the Group since prior years and are considered to be effective.

(vi) Fair value measurements recognized in the condensed consolidated statements of financial position

The Group adopted the amendments to IFRS 7, "Improving Disclosures about Financial Instruments", effective January 1, 2009. These amendments introduce a three-level hierarchy for fair value measurement disclosures and additional disclosures about the relative reliability of fair value measurements. The Group has taken advantage of the transitional provisions in the amendments and accordingly, no comparatives for the hierarchy for fair value measurement disclosures have been presented.

The hierarchy groups financial assets into three levels based on the relative reliability of significant inputs used in measuring the fair value of these financial assets. The fair value hierarchy has the following three levels:

Level 1 – quoted prices (unadjusted) in active markets for identical assets;

Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 – inputs for the asset that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the financial asset is categorized in its entirety is based on the lowest level of input that is significant to the fair value measurement.

The financial assets measured at fair value in the consolidated statements of financial position are grouped into the fair value hierarchy as follows:

	At September 30, 2011			
	Level 1	Level 2	Level 3	Total

19. Financial instruments and financial risk management (continued)

There have been no significant transfers between levels 1 and 2 in the respective reporting periods. The methods and valuation techniques used for the purpose of measuring fair value are unchanged compared to the previous reporting periods. The listed equity securities are denominated in Canadian dollars. Fair values have been determined by reference to their quoted bid prices at the reporting dates.
